CAREER SUMMARY

Systems Engineer and Full Stack Software Developer, combining experience in **frontend** (**TypeScript, React, Next.js**) and **backend** (**Java, Spring Boot, Microservices**). His professional experience includes **implementing continuous improvement** features for production **e-commerce** systems, **resolving critical bugs**, and executing structured code quality cycles covering security vulnerabilities, performance issues, and technical debt. As his undergraduate thesis, he developed **MOVIQ**, a **context-aware movie recommendation system** based on **ontologies (OWL 2 DL)**, a **GraphRAG** pipeline, and an **LLM (Llama 3.3)**, built on a stack including **Apache Jena Fuseki, FastAPI, and Next.js**. He is looking to keep growing in collaborative environments where he can contribute robust, well-thought-out solutions aligned with business goals.

SUMMARY OF QUALIFICATIONS

- Java
- JavaScript
- TypeScript
- React/NextJS
- Spring Boot
- Astro
- Azure DevOps
- AI Tools
- Constant Learning
- Analytical Thinking
- Collaborative Work
- Creativity

CAREER HISTORY

Globant, Colombia

Jan, 2026 – Jul. 2026

Java Backend Trainee

- Selected for specialized training in **Java Microservices**, focusing on enterprise-grade architecture and cloud-ready solutions.
- Developing backend services using **Spring Boot**, ensuring efficient data persistence with **Spring Data JPA**.
- Applying industry-standard design patterns to create robust and scalable **RESTful APIs**.

Frontend Developer Intern (Web Market Platform)

- **Contributed** to a large-scale e-commerce platform built with **Next.js and TypeScript**, implementing continuous improvement features within an **agile** team.
- **Delivered** frontend features including **dynamic API integration** for form components, B2B/B2C user segmentation logic, and **critical bug fixes** in cart modification flows.
- **Led** a codebase-wide quality remediation cycle, **resolving** 14 critical errors, 27 warnings, and 28 informational findings covering security vulnerabilities, memory leaks, race conditions, and **TypeScript/Zustand** improvements.

EDUCATION HISTORY

Universidad del Valle, Colombia

Jan. 2026 – Jul. 2026

Context-Aware Movie Recommendation System (Thesis Project)

- **Developed** an innovative recommendation engine utilizing a modular ontology architecture and **GraphRAG** to deliver **highly personalized cinematic suggestions**. By integrating Semantic Web standards like **OWL and RDF with LLMs**, the system **interprets natural language** to infer complex relationships between user mood, social setting, and film metadata. This approach effectively mitigates common industry challenges such as the “cold-start” problem and information overload, **providing explainable and diverse results** through dynamic SPARQL queries executed on an Apache Jena Fuseki triplestore.
- Tech Stack: **NextJS, Python, Apache Jena Fuseki, SPARQL, OWL, and LLM Integration.**

EDUCATION

Universidad del Valle

BS, Systems Engineering

Tuluá - Valle del Cauca, Colombia

2021 – 2026 (Finished)

ADDITIONAL TRAINING

Unidad Central del Valle

German Program – Nivel 1 (A1 – A2)

Tuluá - Valle del Cauca, Colombia

August 2026 – Actualidad

Unidad Central del Valle

English Program – Level 6 (B2 – B2+)

Tuluá - Valle del Cauca, Colombia

August 2025 – July 2026

CERTIFICATIONS

- APTIS English Certification B2 (APTIS 2026)
- Spring Framework & Spring Boot desde cero a experto (Udemy 2026)
- Visual Elements of User Interface Design (California Institute of Arts 2025)
- Mobile Development and JavaScript (Meta 2025)
- Voxy Proficiency Achievement Certificate – High Intermediate (Voxy 2025)
